

EFFICIENT, EFFECTIVE ECOMMERCE USING PEPPOL

Healthlogistics provides and transmits accurate data to help transform the healthcare supply chain. Our PEPPOL-certified **eConnect service**, for electronically transmitting orders and invoices, allows hospitals and healthcare suppliers to automate and streamline transactions removing unnecessary time associated with manually processed orders and invoices.

If you are considering which PEPPOL access provider to use to meet the Department of Health's deadlines for PEPPOL integration, then look no further.

With our standard eConnect service, when a Trust transfers an order to a supplier via the open standard PEPPOL network, we undertake a conversion process so that the supplier is able to view and process the order. Conversely when a supplier raises an invoice, in a range of formats, we then translate the data so that the Trust receives it in the format that they recognise – all through our PEPPOL access point.

For smaller or emergent suppliers who do not need to transmit high volumes of invoices, a web-based application is also available. With this service, suppliers need to export order data into their existing Finance system.

With Healthlogistics as your PEPPOL certified access provider, Trusts and suppliers can be assured of an effective link to conducting business.

PRICING

There is a fee for integrating a Trust or supplier onto our service. Once 'live', Trusts and suppliers pay a monthly fee, based on banded volumes of documents.

Annual Documents		
Min	Max	Cost per document
0	10,000	£0.24
10,001	30,000	£0.20
30,001	60,000	£0.15
60,001	120,000	£0.12
120,001	200,000	£0.10
200,001	280,000	£0.08
280,001	400,000	£0.06
400,001	600,000	£0.05

DATA ACCURACY DELIVERS BACK OFFICE COST SAVINGS

The challenge most Trusts are struggling with when contemplating sending and receiving purchase orders and invoices electronically is that the data within the Trust catalogue must be accurate.

If this is not the case then the transaction will fail.

The difference between the purchase order detail and the supplier invoice detail will cause the 3-way invoice match to fail at each line. This will add to the work within Procurement and Accounts Payable teams - rather than the planned for reduced administration costs.

We are offering a 100% guarantee* of delivery when combining eConnect with our eCat catalogue management service to match the data, ensuring that the data on a purchase order **will** match the product information returned on the invoice.

* The data fields for this guarantee cover Supplier Name, Part Number, Description and Pack Quantity.

Implementing the PEPPOL standards is an integral part of our NHS eProcurement strategy and will create significant efficiency and quality gains that will benefit patients,"

Steve Graham, eProcurement Lead, Department of Health

HEALTHLOGISTICS: ABOUT US

As specialists in accurate product data, Healthlogistics embraces the need for common supply chain standards and procurement automation across the NHS - and in particular the impact on improving patient safety and delivering significant cost reductions. We support Trusts to ensure that the right products and services are where and when they are needed.

In addition our 'track and trace' capabilities to protect the standards and safety of medical procedures to enhance clinical best practice.

Over 50 NHS acute Trusts have benefitted from our services and data pool.

Healthlogistics is a solution provider of GS1UK and member of ABHI, Healthcare Financial Management Association and a certified PEPPOL Access point provider.
